DETAILED ACTION

1. Acknowledgment is made of applicant's claim for domestic priority under 35 U.S.C. 120 to Applications No. 09/090,121 and 09/354,413. The specification should be amended to include current status of all referenced nonprovisional parent applications.

The examiner notes that this application appears to be a division, and not a continuation, of Application No. 09/354,413. A later application for a distinct or independent invention, carved out of a pending application and disclosing and claiming only subject matter disclosed in an earlier or parent application is known as a divisional application or "division." The divisional application should set forth only that portion of the earlier disclosure which is germane to the invention as claimed in the divisional application.

The specification should be amended to include correct claim for domestic priority under 35 U.S.C. 120, such as "This Application is a divisional of U.S. Patent Application Serial No. 09/354,413 filed (...)"

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim(s) 1 is/are rejected under 35 U.S.C. 102(b) as being anticipated by De Lizasoain (USP 3,667,234) or Ryyänen (USP 4,702,846).

Regarding claim 1, De Lizasoain discloses a method comprising:

- moving a fluid in a first direction (Abstract);
- changing a direction of a portion of the fluid flowing in the first direction and establishing a first rotational flow pattern (Abstract);

- the first rotational flow pattern tangentially intersecting the fluid moving in the first direction
- (Abstract).

Regarding claim 1, Ryyänen, in Fig. 1, discloses a method comprising:

- moving a fluid in a first direction (71);
 - changing a direction of a portion of the fluid flowing in the first direction and establishing a first rotational flow pattern (2);
 - the first rotational flow pattern tangentially intersecting the fluid moving in the first direction
- (Fig. 1).

4. In view of the foregoing, none of the claims are allowed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Basia Ridley, whose telephone number is (703) 305-5418. The examiner can normally be reached on Monday through Thursday, from 8:30 AM to 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola, can be reached on (703) 308-6824.

The fax phone number for Group 1700 is (703) 872-9311 (for Official papers after Final), (703) 872-9310 (for other Official papers) and (703) 305-6078 (for Unofficial papers). When filing a fax in Group 1700, please indicate in the Header (upper right) "Official" for papers that are to be entered into the file, and "Unofficial" for draft documents and other communication with the PTO that are not for entry into the file of the application. This will expedite processing of your papers.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
